# Welcome

Dear Colleagues ,

in our “one day meeting” we will review the most important topics of knee MRI, one of the most common MRI examination in the daily practice for musculoskeletal and for general radiologists. Additionally, we will have an update on some promising topics such as 3D imaging and speed on MRI that will be probably more and more important in the future owing the economic pressure in health care sector.

We hope to offer you an interesting day in Lugano and we are happy to welcome you in our city.
