Welcome

Dear colleagues,

Welcome to our fourth MRI meeting in Lugano in collaboration with the Swiss Society of musculoskeletal Radiology (SSSR). During the meeting we will integrate, as usual, the imaging and the clinical part of spine MRI and very well known speakers coming from USA, Italy, Denmark and Switzerland will discuss and, if possible, will try to answer to many questions that constantly arise during our clinical practice such as: is that an abnormal finding or just a normal variants? What is clinical relevance of some MR findings? Should I report that? What are the advanced in knowledge and the limitations in spine MRI for rheumatology patients? What is the rheumatologist interested in my report? What are is the role of spine MRI in trauma patients? Is that really a spondilodiscitis? These and many other questions will be the background of our meeting that I invite you to attend.

Hope to see you in Lugano
