Welcome

Dear colleagues,

I am happy to announce that our next meeting in 2015 will be organized in partnership with the Swiss Society of Musculoskeletal Radiology (SSSR). Following the same concept of the successful first MR meeting of the hand and wrist that took place last year, we look forward to welcoming you to Lugano in 2015 for the second musculoskeletal MR meeting. In 2015 we will focus our attention on foot and ankle MRI, addressing topics regarding imaging and clinical points of view. Just like last year, several outstanding speakers from the USA, Italy, Germany, and Switzerland will review the most important aspects of this topic. Furthermore, a technical discussion will review the influence of the use of bandwidth on MSK images.

I hope to see you in Lugano soon
